Encourage, facilitate and support the ICT dialogue between relevant EU and Japanese stakeholders on matters relating to cybersecurity and privacy research and innovation issues;

Identify potential opportunities for future cooperation between European and Japanese research and innovation ecosystems;

Foster and promote European cybersecurity innovation activities and increase the international visibility of EU activities in

The first steps towards these objectives were to gather relevant stakeholders in at least two workshops, one in each geography (EU and JP), taking advantage of co-location with other events as much as possible.

The next step, thanks to the expertise of its members, is to collect the appropriate existing research agendas, legislations and business practices in Europe and Japan.

It will then analyze the information collected to formulate recommendations, including business opportunities and a research agenda.

The 1st EUNITY Workshop took place on October 11 till 12, 2017 in Tokyo, Japan

One of the main outcomes of EUNITY project is the “Cybersecurity Research Analysis Report", formed as shown below.

EUNITY (GA No 740507) receives funding from the @EU_H2020 Research and Innovation Programme (H2020-DS-2016-DS-05-2016).
